CrawlerForge Loot Boxes GM Guide

Two ways to deliver a box

Boxes awarded in a CrawlerForge Campaign are rolled when awarded and come into Crawler Companion with the crawler export. Boxes in a pack file arrive as built.

two routes from the Forge to Crawler Companion

In a pack file, a Listed box opens in full and a Random box only rolls its Gold. Award Random boxes in the Campaign. Send Listed boxes in pack files.

Making a box

In the Forge, under Crawler kit, open Loot boxes and click **Create**. Choose how to fill it:

- **Build by hand**: pick every line.
- **Generate**: rolls the contents from the book's tables, your Forge and Discover. Single lines can be rerolled before saving. The result is a Listed box.

Set the tier, type (such as Adventurer, Boss, Pet or Savage), name and description. Under Contents, choose Listed or Random.

Listed

Click **Add content** for each line. Line types:

- Item from your Forge or Discover, or a new one, with a quantity
- Gold or Misc. Junk, as a number or dice such as `1d10x100`

- Skill potion or Stat potion, specific or Player's choice
- Skill at a set Rank, such as Lockpicking at 3
- Text

Random

Random boxes roll separately for each crawler awarded one. Draws from sets the item source: the tier's items (default), items with a tag, or one of your charts. Counts defaults to By the book. Changing any number sets it to Custom. By the book counts:

Tier	Items	Consumables	Skill/Stat potions	Gold
Bronze	1	2	0	1d10
Silver	1	2	1	1d10x100
Gold	1	2	1	1d6x1000
Platinum	1	2	1	2d6x1000
Legendary	2	2	1	1d10x10000
Celestial	2	2	1	none

Awarding in the Campaign

- One crawler: on the Crawlers tab, click **Award** on the crawler's card, find the box and award it.
- The party: on the Table tab, click **Award the party** above the Mobs. All crawlers are ticked. Untick any who should not get one.

Random boxes roll separately for each crawler.

Other ways to award:

- A Mob with a Loot Box on its Loot step opens the Award sheet with that box selected when it dies.
- A Scenario's Rewards and Items & Clues open the Award sheet through Grant and Hand out.
- An Achievement can have a box as its reward.
- A chart row that links an item or Achievement offers Award when rolled.

With the house rule for GM-opened saferooms turned on (under Manage), awarded boxes wait until a saferoom is opened.

For a player not using CrawlerForge, type their name in the roller's Label, choose **Open a box…** and pick the box. The contents post to the Feed under their name. The player adds them by hand.

If a box is missing from the Award sheet, check that it is saved in your Forge, or share it with the table under Manage, Sharing.

Sending a pack file

Use a pack file for players not in the Campaign, or to hand out boxes in advance. Players only need Crawler Companion.

1. On a box's page, click **Add to pack**, or tick several boxes in My Creations and add them together.
2. Add the items those boxes contain to the same pack.
3. Open the pack in My Packs and click **Export**. This saves a file such as `pack-floor-3-rewards.json`.
4. Send the file to the players.

Exporting a single box or ticked rows makes the same kind of file. Boxes in a file should be Listed, since a Random box in a file only rolls its Gold. Generate makes a Listed box with rolled contents.

What players do

Players load the file in Crawler Companion's Gear tab and click Open on the box. Details are in the Crawler Companion Player Guide.

- Campaign award: the box can be left unopened or opened in CrawlerForge. The player exports the crawler (Manage, Export this Crawler), loads it and opens any unopened box.
- Pack file: the player loads it, ticks the boxes, clicks Add to Inventory and opens them.

Opening a box adds its items, rolls Gold and Junk, applies potions (the player chooses Player's choice potions) and adds any Skills.

Rules and limits

Boss boxes match the boss's tier (Core p. 22):

Boss	Box
Neighborhood Boss	Bronze Boss Box
Borough Boss	Silver Boss Box
City Boss	Gold Boss Box
Province Boss	Platinum Boss Box
Country Boss	Legendary Boss Box
Floor Boss	Celestial Boss Box

- A crawler can drink two Stat potions and two Skill potions in total (Core p. 226). Crawler Companion warns before a third.
- Stat potions raise Unenhanced and Enhanced.
- Enchanted gear rolls on Tables 38 to 42 by tier, from none at Bronze to five at Celestial (Core p. 219).
- Boxes are opened in a saferoom. An unopened box cannot be taken off a body.

Item setup for Crawler Companion:

- Effect types that become bonuses: stats (including All Stats), Skill ranks, DR, Evade, and consumables that heal or restore Mana. Other effects (Move, extra damage, percentage stat bonuses, inherent spells) are written into the item's notes.
- The box name becomes an Inventory row. Brackets and semicolons are removed.
- Player's choice potions are chosen by the player when the box is opened.
- The Inventory has 20 rows. A box whose contents do not fit does not open.

Crawler Companion cannot roll a Random box's items, consumables or potions, or replay crafting and enchanting from a crawler file. Award Random boxes in the Campaign, or use Generate to make a Listed box.
